## Training Methodology

**Erudition by doing** is the simple philosophy behind **Futuresoft's** unique blended learning methodology. The proportionate combination of theoretical and practical sessions is aptly complemented by regular workshops on industry trends and emerging technologies.

### Course Material ...

To hammer the habit of self-learning, the students are also provided with

course material and CDs, developed by **Futuresoft's** technical team. Students enrolled in the career courses are groomed to become professionals through **Futuresoft's** core Training Methodology.

These sessions are aimed at making the students *industry-ready-professionals* by imparting few crucial components like CV preparation, interview skills and soft skill development, body language and etiquettes, which are vital for them in the competitive job environment.

### Expert training ...

**Futuresoft** initiated a unique idea to impart training by industry experts to create a platform where students get the opportunity to interact with vastly experienced industry professionals and gain valuable inputs from them.

### Placement Assistance ...

Students, after completion of training, will undergo a screening followed by mock interviews and an examination. With this, one can be easily judged as how fast he/

she can appear at an interview and be successful.

### Project ...

one of the vital parts in the entire training methodology. It determines a student's knowledge and credibility in his/her professional career. Students can get to know the real integration part in order to crack an interview.
